

Parent Health Literacy Training

Helping Families Use the Book “What To Do When Your Child Gets Sick”

This introduction to Parent Health Literacy will give you tips and tools for working with parents of young children. The various materials that have been developed will lend themselves to working with large and small groups of families as well as on a one-on-one basis. The overall goals of this curriculum are empowerment of families and reduction in the number of unnecessary doctor and ER visits.

In addition to providing an overview of the book What To Do When Your Child Gets Sick, this half-day training will focus on the skills necessary to work with low literacy parents. Three (3) CEUs are available upon request for \$15.00; a registration form will be distributed at the session to those interested.

By attending this training, you and your agency are invited to partner with the KHSA Parent Health Literacy Project to distribute this book and teach parents how to use it to make health-care decisions regarding their children aged 0-8.

This project is sponsored by Kansas Head Start Association with funding provided by Blue Cross and Blue Shield of Kansas Foundation and KHSA.

Registration is available through August 21 at: <https://www.eventbrite.com/e/parent-health-literacy-training-manhattan-tickets-61805303326>

For additional information, contact KHSA at 785-856-3132 or Randy Tedford at rtconsulting18@gmail.com.
