

## **PERSONAL STATEMENT: Beth Oller, MD, FAAFP**

I have been a part of the KAFP since my first year of medical school. I had the opportunity to serve as a member of the Board of Directors as a student and a resident, and held an at-large position last term. I also serve as the co-chair of the Education Committee and have for the past several years and serve the AAFP as a member of the Commission on Federal and State Policy.

I am dedicated to serving our profession nationally as well as serving our state chapter to grow and promote our specialty and the health of our communities. I strive to serve the underserved not only in my rural community, but also in my advocacy efforts regarding reproductive access and LGBTQ+ equality, and work to teach these skills and perspectives to medical students who rotate in my practice as well as to all those I interact with. I would welcome the opportunity to continue to serve the KAFP in the capacity of a Board member.
