

Personal Statement: Christine Edomwande, MD, MS

As an applicant for medical school, my personal statement expressed my desire to be a family physician. I was drawn to the opportunity of continuity of care and the ability to care for every member of the family, no matter their age or stage in life. For me, the goal has always been family medicine. I've found myself growing to love the specialty more and more over the years as I've learned more about our scope of practice and our impact in health care. I am applying for Resident Director because of my passion for family medicine and desire to advance the specialty in Kansas and beyond.

In this position, I can have a more hands-on role and a seat at the table to directly participate in decisions and progression of our specialty. I have previously held positions in medical school where I was an advocate for family medicine amongst my peers and participated in the Family Medicine Champions program where I was able to acquire skills and knowledge to help guide students in considering a future in family medicine. I would be honored to continue this work in a similar role at the resident level and help to promote the initiatives and programming of the KAFP amongst Kansas residents.
